Geetha is poor in dealing with arrays. But her teacher gave her an array and asked to interchange the biggest number with the smallest number.

Input Format

First line contains the number of elements of array, n Second line contains the n spaced integers which are elements of the array

Constraints

interchanging

Output Format

Array in which the largest and the smallest numbers are interchanged

Sample Input 0

5
3 5 7 8 4

Sample Output 0

8 5 7 3 4

Change Theme

Language

Java 15

```
1 import java.util.Scanner;
2
3 public class SwapLargestSmallest {
4     public static void main(String[] args) {
5         Scanner sc = new Scanner(System.in);
6         int n = sc.nextInt();
7         int[] arr = new int[n];
8         for (int i = 0; i < n; i++) {
9             arr[i] = sc.nextInt();
10        }
11        int maxIndex = 0;
12        int minIndex = 0;
13        for (int i = 1; i < n; i++) {
14            if (arr[i] > arr[maxIndex])
15                maxIndex = i;
16            if (arr[i] < arr[minIndex])
17                minIndex = i;
18        }
19        int temp = arr[maxIndex];
20        arr[maxIndex] = arr[minIndex];
21        arr[minIndex] = temp;
```
